

“From Medi-centric to Techno-centric Medicine: Research and Innovation” Corona virus the new “artificial intelligence” infection.

If you want to see the present you have to look at the past, as nothing transforms more the historical fact than the present interpretations of the human vision, transformed and distorted by ideological translation.

You can compare it with Eros and love, where all past experiences are described as ideal; real time likes to transform these experiences to make us feel heroes of an adorable deep feeling, which gave us power and optimistic feelings.

Under this paradoxical point of view we can explain why the great calamities of humanity, either in the form of deadly war conflicts or pandemic infections, had heirs to humanity's evolution in science and social development.

During the recent pandemic, apart from the deaths and fear worldwide, the scientific community responded with millions of articles and profound research in a period of just few months. A new vaccine in the past would have needed years upon years of research, but nowadays only a few months were plenty to discover more than one.

Metaphorically, we could say that this new virus assisted our brain to think deeply and fast like the artificial intelligence machines that are competing with the real biological brain, using millions of microchips but fortunately, without the phantasy which sometimes is more useful than algorithms.

As Albert Einstein said when you cannot find the truth in science and numbers, just sleep and imagine it. It was with this dream that he saw the light as a curve and not as simple equation of speed.

Human endeavor is without boundaries; this is the reason we are running today the 4th Greek - Chinese symposium, virtually but still warm. Feelings of human beings, even if you cannot see them, you can magnify them with phantasy and stimulate them through new scientific evolution.

Hope to see you here and there for future discussions dear friends from
Greece and China.

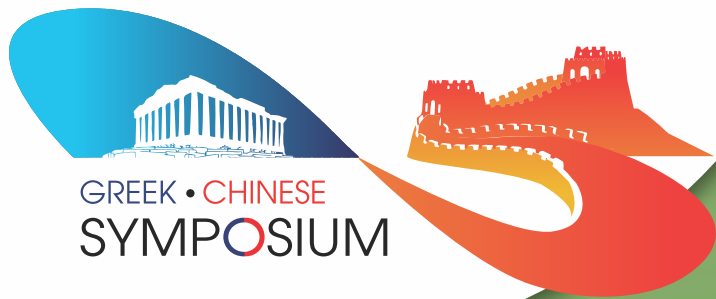

Kostas Konstantinidis

Organized by

K. KONSTANTINIDIS
ANDROLOGY
INSTITUTE

**Scientific Committee: K. Konstantinidis
C. Fliatouras**

GREEK • CHINESE
SYMPOSIUM

“From Medi-centric to Techno-centric
Medicine: Research and Innovation”

17
APRIL
2021

Hostess

Wang Xiaoqing

Coordinators

Papatsoris Athanasios

Long Tian

Modiano Alexandros

Konstantinidis Konstantinos

12:00 - 12:15

High-end Li ESWT devices from China and their applications

Ling Bo

12:15 - 12:30

Evaluation of 1 minute circumcision stapler

Long Tian

12:30 - 12:45

Medical Technology in Urology: Present and Future

Liatsikos Evangelos

12:45 - 13:00

Transurethral Water Vapor Therapy for Benign Prostatic Hyperplasia

Kyriakou Georgios

13:00 - 13:15

High Intensity Focused Ultrasound in Prostate Cancer Treatment

Thanos Anastasios

13:15 - 13:30

Application of In-situ Reconstruction Technique for Bladder Cancer under Total Laparoscopic

Zhang Dahong

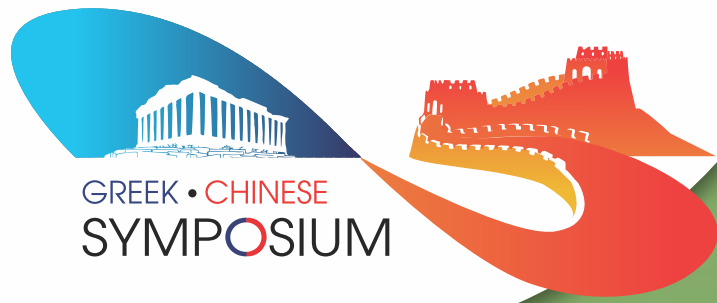

13:30 - 13:45

The role of endovascular therapy in penile arteriopathy

Bisdas Theodosios

PROGRAM

GREEK • CHINESE
SYMPOSIUM

“From Medi-centric to Techno-centric
Medicine: Research and Innovation”

17
APRIL
2021

Hostess

Wang Xiaoqing

Coordinators

Papatsoris Athanasios

Long Tian

Modiano Alexandros

Konstantinidis Konstantinos

13:45 - 14:00 Treatment of oligometastatic prostate cancer:
Experience from Fudan University Shanghai Cancer Center
Dai Bo

14:00 - 14:15 Li ESWT vs Medication Treatment in
Erectile Dysfunction
Fliatouras Christos

14:15 - 14:30 From Medi-centric to Techno-centric Medicine
Skoufias Spyridon

14:30 - 14:45 Presentation of the novel mobile Li ESWT device
Ein-Gal Moshe

14:45 - 15:00 Erection Health Rejuvenation - Lessons Learned
in Treating over 800 patients in 1 Centre
Konstantinidis - Vasilakos Christos

15:00 - 15:15 Fertility during the SARS-CoV-2 pandemic
Pantos Konstantinos

15:15 - 15:30 Stress and sexuality in the time of pandemic
Chrousos Georgios

15:30 - 15:45 The Silk Road from China to Greece and
vice versa
Konstantinidis Konstantinos

PROGRAM

17
APRIL
2021

PARTICIPANTS

- **Professor Bisdas Theodosios**, MD, PhD, Associate Professor of Vascular Surgery, Aristotle University of Thessaloniki, Director of 3rd Vascular Surgery Clinic, Athens Medical Center.
- **Professor Chrousos George**, MD, ScD, Pediatrics and Endocrinology, National and Kapodistrian University of Athens School of Medicine, Director of University Research Institute of Maternal And Child Health & Precision Medicine, UNESCO Chair on Adolescent Health Care.
- **Professor Zhang Dahong**, Chief Physician, Professor, Doctoral Supervisor, Discipline Leader of Urology, Head Of Uroscopy/Tumor Center, Vice President of Zhejiang Provincial People's Hospital
- **Dai Bo**, Chief Physician, Doctor of Medicine, Master's Supervisor, Deputy Director of Department of Urology, Fudan University Shanghai Cancer Hospital.
- **Ein Gal Moshe**, PhD, CEO at Direx & Hikkonu Medical Devices.
- **Fliatouras Christos**, MD, PhD, Surgeon Urologist – Andrologist, Scientific Director of the Andrology Institute.
- **Konstantinidis Konstantinos**, MD, PhD, Surgeon Urologist-Andrologist, Founder and Director of the Andrology Institute, Director of the Sexual Health Clinic at Athens Medical Center.
- **Konstantinidis – Vasilakos Christos**, Director of Andrology Institute London
- **Kyriakou Georgios**, MD, PhD, FEBU, Surgeon Urologist, Director of Department of Minimally Invasive Urological Surgery, Athens Medical Center.
- **Professor Liatsikos Evangelos**, MD, PhD, FEBU, Director of the Urology Clinic, University Hospital of Patras, Director of the European School of Urology (ESU), Former Director of ESUT.
- **Ling Bo**, China Beijing Zhongde Boda Investment Management Co. Ltd. President and Zhengzhou Boda Urology Hospital General Manager.
- **Long Tian**, Deputy Chief Physician, Urology Department, Head of the Urology – Andrology group of Beijing Chaoyang Hospital, Capital Medical University
- **Modiano Alexandros**, Chairman, West-East Urban Governance Institute, former Deputy Mayor of Athens
- **Pantos Konstantinos**, MD, PhD, Obstetrician – Gynaecologist, Director of “Genesis Athens” Fertility Clinic, Secretary of the Hellenic Society of Reproductive Medicine.
- **Professor Papatsoris Athanasios**, MD, MSc, PhD, FEBU, FES, Assoc. Professor of Urology at the 2nd Department of Urology, School of Medicine, Sismanoglio General Hospital
- **Skoufias Spyridon**, MD, PhD, Surgeon Urologist, Senior Registrar at the Urology Clinic of IASO Maternity and Fertility Clinic.
- **Thanos Anastasios**, MD, PhD, FEBU, Director-Coordinator “Ygeias Melathron” TYPET
